DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1 and 3 are rejected under 35 U.S.C. 102(e) as being anticipated by Jamal et al U.S. Patent Number 5,930,366.

Re Claim 1, fig. 7 teaches a base station transmitter transmitting a synchronization signal in a spread spectrum communication system, wherein this system encompasses WCDMA that is asynchronous (...wireless communication system), wherein the base station includes switches 164 and these switches are independently selected to omit transmission of Cp and combined code intermediate signal (See col. 13, lines 32-55), wherein theses codes are transmitted per slot and repeated each frame (See col. 6, lines 12-25 & col. 7, lines 1-6).

Re Claim 3, refer to Claim 1, wherein the preset position of the synchronization signal refers to the position of the time slot within the frame structure and independently controlled by the switches.

Allowable Subject Matter

3. Claims 5-15 are allowed.
4. Claims 2, 4, 16 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

As U.S. Patent Number 5,930,366 teaches switches in the base station to independently control the transmission of combined sync codes, prior art fails to teach in combination with claims 1 and 16, the omitted one of the synchronization codes is used to identify the base station as the source of the synchronization signal.

Response to Arguments

5. Applicant's arguments filed 7/21/04 have been fully considered but they are not persuasive.

Re Claim 1, Applicant argues that Jamal fails to teach an asynchronous wireless communication system. However, Jamal teaches that base station operates in an spread spectrum wireless communication system that includes WCDMA that is asynchronous.

Furthermore, the recitation "asynchronous wireless communication system" has not been given patentable weight because the recitation occurs in the preamble. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the

Art Unit: 2663

claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

Applicant is correct in submitting that Jamal discloses a Cp repeated in each slot of the repeating frame. However, it is the switches in the base station that control the insertion of the Cp code per slot location. Hence, at least one Cp code is omitted in the frame structure.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
